## CUSTOM MADE and MODIFIED FURNITURE

Although most of the goods we supply form part of standard collections we are regularly asked to provide variations.

### UPHOLSTERY

Upholstered models ( except the Walter Knoll FK Classic and FK Lounge ) can be made in customers own fabric or leather choice, subject to approval for use by the manufacturer. However, we cannot take responsibility for the choice of upholstery specified by clients or their representatives and therefore cannot accept any complaints with regard to the appearance or subsequent performance of the material.

**Nimbus 1 and 2** collections can be modified on request and we also have the facility to manufacture custom designed models.

### CHAIR FRAMES

In general metal work will be available only as listed although some models do provide for alternative powder coated finishes for a supplement.

Most timber frames are beech or oak and can be stained to special colours on request, for a supplement

### DESKS and ALL TABLES

Most models can be made in veneers other than those listed as standard. Staining to special colours is also commonly requested. Cabinets and carcasses in materials other than wood veneer cannot usually be altered.

All **Tula** tables can be made with decorative inlays, patterns or corporate logos. Special sizes and shapes are readily available.

Within more limited parameters the Walter Knoll collection of executive desks and tables can also be modified in size, shape and plain veneer.

Glass topped models can sometimes be supplied in special finishes.
